UNIVERSITY**
EDUCATION TO INNOVATION

School of Technology, Design & Computer Application
Silver Oak College of Engineering & Technology
Bachelor of Technology
Information Technology
Web Technology with UI/UX

Semester:	4th	Academic Year:	2024-25
Course Name:	Web Technology with UI/UX	Course Code:	1010043228

Question Bank

Sr No.	Question	Marks	CO
Unit-1 Working with HTML5			
1	What is the purpose of semantic elements in HTML5	2	CO-1
2	Name two multimedia elements supported by HTML5.	2	CO-1
3	How do you define a required field in an HTML form with an example?	4	CO-1
4	List all HTML tag which are new and removed in HTML5.	4	CO-1
5	What is the significance of using placeholder attributes in form inputs with example?	3	CO-1
6	What is the difference between a canvas and SVG element in HTML5?	4	CO-1
7	Discuss the benefits of using semantic elements over traditional HTML elements.	3	CO-1
8	List and briefly describe at least five different input types in HTML5.	5	CO-1

9	What is Grail layout in HTML?	8	CO-1
10	Explain HTML <FORM> element with all form attributes with example.	8	CO-1
11	Create a basic student detail form that will take input data, including First Name, Last Name, Gender, Enrollment ID, Designation, and Phone Number.	8	CO-1
12	Explain the any five Git for command with syntax and example.	5	CO-1
13	How do you create a new repository on GitHub?	3	CO-1
14	What are branches in Git and why are they used?	3	CO-1
15	Explain the concept of Pull and Push Requests in GitHub.	4	CO-1
16	Define following terms:	5	CO-1
	1) Canvas		CO-1
	2) Figma		CO-1
	3) Hierarchy		CO-1
	4) Components		CO-1
	5) Prototyping		CO-1
Unit-2 Working with CSS3			
1	What is CSS? What are the benefits of CSS? List out the different ways to write CSS.	3	CO-2
2	List and Explain types of CSS with Example.	4	CO-2
3	Explain CSS box model (border, margin, padding) with neat diagram.	8	CO-2
4	Explain Class and ID Selector in CSS with examples.	4	CO-2
5	What is CSS Display? Explain it with example.	4	CO-2

6	Explain the use of Media Query in CSS with example.	4	CO-2
7	Demonstrate the use of CSS for Colors and Background	4	CO-2
8	Define viewport, CSS, CSS selector.	3	CO-2
9	Enlist the various attributes of font?	3	CO-2
10	Explain Flex layout in detail with example.	8	CO-2
11	What is grid layout? Explain grid layout in detail with example.	8	CO-2
12	What is the difference between CSS and CSS3?	4	CO-2
13	Compare Hexadecimal color codes with RGB values? What does 'a' in the RGBA mean?	4	CO-2
14	List some of the CSS frameworks.	3	CO-2
15	What is Z-index?	3	CO-2
16	What does margin: 40px 100px 120px 80px signify?	4	CO-2
17	What is responsive web design?	3	CO-2
18	What are the limitations of CSS?	4	CO-2
19	How is padding and margin different from one another in CSS with example?	4	CO-2
20	How are block-level and inline elements different from one another in CSS?	4	CO-2
21	Using HTML, CSS create a hover and focus effect for navigation items, using CSS transformations.	8	CO-2
22	How would you select all paragraphs within a div with the class "container" using CSS selectors?	4	CO-2
23	Compare and contrast Flexbox and Grid Layouts in CSS, highlighting their main differences and use cases.	8	CO-2
24	Provide an example of how you would create a simple two-column layout using Flexbox.	8	CO-2

25	Explain how CSS Grid Layout differs from traditional layout methods like floats and positioning.	8	CO-2
26	Explain the display property in CSS and its various values.	8	CO-2
27	Describe how you would create rounded corners for a box element using CSS.	3	CO-2
28	Discuss the use of border images in CSS and provide an example.	4	CO-2
29	Discuss the role of CSS frameworks like Bootstrap in facilitating responsive web design.	8	CO-2
Unit-3 Working With JavaScript			
1	What is JavaScript? What are the benefits of JavaScript?	3	CO-3
2	Differentiate Client side scripting and Server side scripting	4	CO-3
3	Explain pop-up boxes in JavaScript with example.	3	CO-3
4	Explain DOM in javascript.	4	CO-3
5	Explain Callback function in JavaScript with example	4	CO-3
6	What is JavaScript event handling? List the major events and show use of at least one event by writing JavaScript code.	8	CO-3
7	Demonstrate the use of onchange, onmouseover, onmouseout, onkeypress, onload, onfocus events with proper example.	8	CO-3
8	List out JavaScript's inbuilt Objects. Explain any three JavaScript's inbuilt Objects with proper example.	8	CO-3
9	How user defined Objects are created in Javascript? explain with proper example.	8	CO-3
10	Explain concept of Array in JavaScript. Also Demonstrate use of any three methods of Array with proper example.	8	CO-3
11	Demonstrate JavaScript Form Validation with proper example.	8	CO-3
12	Write a Java Script code to display Fibonacci Series of given number. Number should be entered by user through text box.	8	CO-3
13	Write a JavaScript code to change the background color of page at specific time interval.	4	CO-3

14	Write a JavaScript code which takes integer number as input and Tells whether the number is prime or not.	8	CO-3
15	Write JavaScript code that display the text “SILVER OAK UNIVERSITY” with increasing font size in interval of 1 second in blue color. When font size reaches to 50px it should stop.	8	CO-3
16	Difference between “== “ and “=== “ operators.	3	CO-3
17	Difference between var and let keyword in javascript.	4	CO-3
18	What is NaN property in JavaScript?	3	CO-3
19	Explain call(), apply() and, bind() methods.	8	CO-3
20	What is DOM? Explain in detail.	8	CO-3
21	What are JavaScript Data Types?	4	CO-3
22	What would be the result of 3+2+”7”?	3	CO-3
23	Write a JavaScript code for adding new elements dynamically.	4	CO-3
24	What are all the looping structures in JavaScript? Explain in detail with example	8	CO-3
25	What are all the control structures in JavaScript? Explain in detail with example	8	CO-3
Unit-4 Working with jQuery and Bootstrap			
1	What is jQuery? What is jQuery used for? List some Features of jQuery.	3	CO-4
2	What are the advantages of jQuery?	3	CO-4
3	How is jQuery different from javascript?	3	CO-4
4	What is the difference between the methods onload() document.ready()?	4	CO-4
5	How to iterate/loop through all p elements in jquery.	4	CO-4

6	Explain \$(document).ready() function?	4	CO-4
7	What are the jQuery functions used to provide effects?	4	CO-4
8	What is the use of css() method in jQuery?	3	CO-4
9	Which jquery method is used to hide selected elements?	3	CO-4
10	What are events in jQuery? List any five events with example.	8	CO-4
11	Define term: Event, Event handler, Event Object.	3	CO-4
12	What is CDN?	3	CO-4
13	What are the selectors in jQuery? How many types of selectors in jQuery?	8	CO-4
14	Explain how CSS classes can be manipulated in HTML using jQuery.	4	CO-4
15	State some different types of jQuery Methods.	4	CO-4
16	Explain jQuery Callback Functions	4	CO-4
17	Explain in detail jQuery - AJAX get() and post() Methods with example.	8	CO-4
18	What is Traversing?	3	CO-4
19	What is Bootstrap?	3	CO-4
20	What are the advantages of Bootstrap?	3	CO-4
21	What is a Bootstrap Container, and how does it work?	4	CO-4
22	What do you know about the Bootstrap Grid System?	8	CO-4
Unit-5 Understanding PHP & MySql and MVC			
1	What is PHP?	3	CO-5

2	Explain Various Features of PHP.	3	CO-5
3	Explain how to embed php code in HTML page?	4	CO-5
4	What do you meant by WAMP, LAMP and XAMP?	3	CO-5
5	What is phpinfo() Function?	3	CO-5
6	What is variable? How to define variable in php with example.	4	CO-5
7	What are the rules to define variable in PHP?	4	CO-5
8	Explain all types of scope of variable?	8	CO-5
9	Why \$\$ are used in PHP?	3	CO-5
10	What is operator? List out PHP operators.	3	CO-5
11	Explain PHP operator in detail.	8	CO-5
12	What is the syntax for single line and multiple line comment in php.	3	CO-5
13	Explain PHP Spaceship Operators in detail with example.	4	CO-5
14	What is constant? How to define PHP Constants?	3	CO-5
15	List and explain different types of array in PHP with example.	8	CO-5
16	Discuss various array functions used in PHP.	8	CO-5
17	How to store a data in array? And explain it.	4	CO-5
18	Difference between ECHO and PRINT.	3	CO-5
19	State advantages of PHP over other Languages	4	CO-5
20	Demonstrate GET, POST and REQUEST methods of PHP.	8	CO-5

21	Differences between GET and POST methods?	4	CO-5
22	List conditional statements and explain in detail with example	8	CO-5
23	List looping statements and explain in detail with example.	8	CO-5
24	Explain foreach loop in brief with example.	4	CO-5
25	Explain require () and include () functions in PHP.	4	CO-5
26	Create webpage in PHP that collect user information and also display that information on other page.	8	CO-5
27	What are the steps to access My SQL databases in PHP?	4	CO-5
28	List MySQLi Functions used in PHP.	4	CO-5
29	Explain CRUD (create, Read, Update, Delete) Operation with database connectivity in PHP.	8	CO-5
30	Write a program in HTML (Web-Page) having a form with firstname, lastname and a submit button. On clicking the button form validation should work (Use Javascript for that) and data entry should be saved in a database (PHP code needed, for insertion of data from “form” to database). Form should be styled using CSS. (Use any mode- inline, internal or external)?	8	CO-5
31	Write the PHP code for fetching the data from a database to a webpage?	8	CO-5
32	Describe how HTML forms can be used to collect user input and submit it to a PHP script for processing.	8	CO-5
